

# Paulig Dias

**Paulig Dias** a high volume coffee vending machine with automatic take-away cup dispenser. Paulig Dias brews espresso and filter coffee from fresh beans and the machine has five containers for instant products such as milk, hot chocolate, sugar, juices and teas.

This freestanding machine has a large 22” touch screen and the intuitive user interface makes it very easy to use in public locations as well. Dias allows up to 64 product selections to be programmed on the selection menu.

**Variflex** is a self-adjusting brewer featuring a brewing chamber that automatically adjusts its volume to the quantity of milled coffee required by the end user's drink selection, thereby making the optimal use of the dose. The interaction between the mechanics and the software ensures the ideal brew pressure, as well as a homogeneous distribution of the grinds. Which in turn means a perfect cup of coffee, every time.

**TMON** is a remote access tool for the Paulig Explorers family of coffee machines. TMON makes it possible to read telemetry from the machines, such as consumption, temperatures, ingredient levels inside the containers and error and use logs. With TMON, it is also possible to access the machine remotely for recipe and settings changes, software updates or media uploads.

Paulig Dias machines support optional payment systems from coin mechanics and credit cards to various cashless payment options.

### Specifications:

- Country of origin: Italy
- Bean hopper capacity: 2 x 3000 g
- Instant containers capacity: 5 x 5,2 l
- Voltage: 230 V 16 A
- Power: 3000 W
- A-weighted sound pressure level: > 70 dB (A)
- Water connection: 3/8" gas male face
- Dimensions and weight: H 1830 x W 640 x D 700 (mm), 80 kg
- Dimensions for installation: H 1840 x W 690 x D 800 (mm)
